1 Affected Products

All variants of the following CODESYS V3 products in all versions prior V3.5.14.20 containing the CmpGateway component are affected, regardless of the CPU type or operating system:

- CODESYS Control for BeagleBone
- CODESYS Control for emPC-A/iMX6
- CODESYS Control for IOT2000
- CODESYS Control for Linux
- CODESYS Control for PFC100
- CODESYS Control for PFC200
- CODESYS Control for Raspberry Pi
- CODESYS Control V3 Runtime System Toolkit
- CODESYS Gateway V3
- CODESYS V3 Development System

2 Vulnerability overview

2.1 Type
Uncontrolled Memory Allocation

2.2 Management Summary
A crafted communication request may cause uncontrolled memory allocations in the affected CODESYS products and may result in a denial-of-service condition.

2.3 References
ICS-CERT: ICSA-19-213-03 [8]
CODESYS JIRA: CDS-64208, CDS-65657

2.4 Severity Rating
3S-Smart Software Solutions GmbH has rated this vulnerability as high.

The CVSS v3.0 base score of 7.5 has been assigned. The CVSS vector string is (CVSS:3.0/AV:N/AC:L/PR:N/UI:N/S:U/C:N/I:N/A:H). [7]

3 Vulnerability details

3.1 Detailed Description
The CODESYS Gateway routes the online communication between clients like the CODESYS Development System and CODESYS Control runtime systems. As optional component of CODESYS Control runtime systems it may also run on PLC devices.

A crafted communication request may cause uncontrolled memory allocations in the affected CODESYS products and may result in a denial-of-service condition.

3.2 Exploitability
This vulnerability could be exploited remotely.

3.3 Difficulty
An attacker with low skills would be able to exploit this vulnerability.
3.4 Existence of exploit
No known public exploits specifically target this vulnerability.

4 Available software updates
3S-Smart Software Solutions GmbH has released versions V3.5.14.20 and V3.5.15.0. Each of them solves the noted vulnerability issue.
Please visit the CODESYS update area for more information on how to obtain the software update [3].

5 Further References
See also Advisory 2019-02 for another CODESYS Gateway vulnerability.

6 Mitigation
3S-Smart Software Solutions GmbH recommends using the available software update to fix the vulnerability.
Currently, 3S-Smart Software Solutions GmbH has not identified any specific workarounds for this vulnerability, in case the software update is not applied.
As part of a security strategy, 3S-Smart Software Solutions GmbH recommends the following general defense measures to reduce the risk of exploits:
• Conduct or reinforce security awareness training for users
• Use controllers and devices only in a protected environment to minimize network exposure and ensure that they are not accessible from outside
• Use firewalls to protect and separate the control system network from other networks
• Use VPN (Virtual Private Networks) tunnels if remote access is required
• Activate and apply user management and password features
• Limit the access to both development and control system by physical means, operating system features, etc.
• Protect both development and control system by using up to date virus detecting solutions
For more information and general recommendations for protecting machines and plants, see also the CODESYS Security Whitepaper [1].

7 Acknowledgments
3S - Smart Software Solutions GmbH thanks those in the security community, who help us to improve our products and to protect customers and users through coordinated vulnerability disclosure.
We thank Martin Hartmann from cirosec GmbH for reporting this vulnerability following coordinated disclosure.

8 Further Information
For additional information regarding the CODESYS products, especially the above-mentioned versions, or about the described vulnerability please contact the 3S-Smart Software Solutions support team [5].

9 Disclaimer
3S-Smart Software Solutions GmbH assumes no liability whatsoever for indirect, collateral, accidental or consequential losses that occur by the distribution and/or use of this document or any losses in connection with the distribution and/or use of this document.
