Advisory 2020-05

Security update for CODESYS V3 Visualization

Published: 23 July 2020

CONTENT

1   Affected Products

All CODESYS V3 runtime systems in all versions before V3.5.16.10 are affected, which support the CODESYS Target- or Webvisualization and contain CmpVisuServer and CmpVisuHandler, regardless of CPU type or operating system:
• CODESYS Control for BeagleBone
• CODESYS Control for emPC-A/iMX6
• CODESYS Control for IOT2000
• CODESYS Control for Linux
• CODESYS Control for Linux ARM
• CODESYS Control for PLCnext
• CODESYS Control for PFC100
• CODESYS Control for PFC200
• CODESYS Control for Raspberry Pi
• CODESYS Control for WAGO Touch Panels 600
• CODESYS Control RTE V3
• CODESYS Control RTE V3 (for Beckhoff CX)
• CODESYS Control Win V3 (also part of the CODESYS Development System setup)
• CODESYS V3 Simulation Runtime (part of the CODESYS Development System)
• CODESYS HMI V3
• CODESYS Control V3 Runtime System Toolkit
• CODESYS V3 Embedded Target Visu Toolkit
• CODESYS V3 Remote Target Visu Toolkit

2   Vulnerability overview

2.1   Type

CWE-789: Uncontrolled Memory Allocation [7]

2.2   Management Summary

Specifically crafted requests sent to the CODESYS Control runtime system can allocate arbitrary amounts of memory, causing the system to run out of memory and possibly crash.

2.3   References

CVE: CVE-2020-15806 [6]

CODESYS JIRA: CDS-71179, CDS-71491

2.4   Severity Rating

CODESYS GmbH has rated this vulnerability as high.

The CVSS v3.0 base score of 8.6 has been assigned. The CVSS vector string is (CVSS:3.0/AV:N/AC:L/PR:N/UI:N/S:C/C:N/I:N/A:H). [8]

3   Vulnerability details

3.1   Detailed Description

Visualization masks created in CODESYS are displayed with the help of some components of the CODESYS Control runtime system, which process the requests to display it on the screen. Specifically crafted requests sent to the CODESYS Control runtime system can allocate step-by-step arbitrary amounts of memory, causing the system to run out of memory and possibly crash.

3.2   Exploitability

This vulnerability could be exploited remotely.

3.3 Difficulty

An attacker with low skills would be able to exploit this vulnerability.

3.4 Existence of exploit

POC is publicly available.

4 Available software updates

CODESYS GmbH has released version V3.5.16.10 to solve the noted vulnerability issue for all affected CODESYS products.

Please visit the CODESYS update area for more information on how to obtain the software update [3].

5 Mitigation

CODESYS GmbH recommends using the available software update to fix the vulnerability.

Currently, CODESYS GmbH has not identified any specific workarounds for this vulnerability, in case the software update is not applied.

As part of a security strategy, CODESYS GmbH recommends the following general defense measures to reduce the risk of exploits:
• Use controllers and devices only in a protected environment to minimize network exposure and ensure that they are not accessible from outside
• Use firewalls to protect and separate the control system network from other networks
• Use VPN (Virtual Private Networks) tunnels if remote access is required
• Activate and apply user management and password features
• Limit the access to both development and control system by physical means, operating system features, etc.
• Protect both development and control system by using up to date virus detecting solutions
For more information and general recommendations for protecting machines and plants, see also the CODESYS Security Whitepaper [1].

6 Acknowledgments

CODESYS GmbH thanks those in the security community, who help us to improve our products and to protect customers and users through coordinated vulnerability disclosure.

We thank Tenable, Inc. for reporting this vulnerability following coordinated disclosure.

7 Further Information

For additional information regarding the CODESYS products, especially the above-mentioned versions, or about the described vulnerability please contact the CODESYS support team [5].

8 Disclaimer

CODESYS GmbH assumes no liability whatsoever for indirect, collateral, accidental or consequential losses that occur by the distribution and/or use of this document or any losses in connection with the distribution and/or use of this document. All information published in this document is provided on good faith by CODESYS GmbH.
